## Education

---

### California State Polytechnic University, Pomona

Aug 2022 - Dec 2025 (Expected)

Bachelor of Science, Computer Science

Pomona, CA

- GPA: 3.91/4.0
- Relevant Coursework: Data Structures, Algorithms, Machine Learning, Cloud Computing
- Activities & Awards: Computer Science Society, Software Engineering Association, Dean's List

## Experience

---

### Cardiac Vision Lab, University of California, San Francisco

Jun 2023 - Present

Research Assistant

Remote

- Researching deep learning segmentation of hearts in ultrasounds under Professor Jan Christoph.
- Developed MATLAB script for generating realistic synthetic ultrasound data from heart point clouds.
- Training and fine-tuning U-Net model with my generated synthetic data, improving the results of the model from previous training data.

### Code Ninjas

Jun 2023 - August 2024

Programming Tutor

Hacienda Heights, CA

- Taught classrooms of 20+ elementary school-aged children programming and problem-solving skills with HTML/CSS/JavaScript.

## Projects

---

### BroncoDirectMe | [broncodirect.me](https://broncodirect.me)

Aug 2022 - Present

BroncoDirectMe is a web extension with 350+ users that improves Cal Poly Pomona's class registration portal.

- Utilized React, TypeScript, and Material UI for new portal features, such as displaying average course GPAs and RateMyProfessor data fetched using REST API's, increasing the functionality of the portal.
- Designed modernized website UI mockup using Figma, enhancing the user experience and presentation of the portal.
- Coordinated multi-week agile sprints for 20+ Cal Poly Pomona students by writing main objectives, technical tasks, and pull request acceptance criteria. Participated in 100% of team scrums.
- Achieved the Google Featured Extension badge by adhering to Chrome Web Store's best practices, increasing visibility and user engagement.

### NFL Mock Draft Simulator | [github.com/alimomennasab/NFLMockDraft](https://github.com/alimomennasab/NFLMockDraft)

Jun 2024 - Aug 2024

An NFL Mock Draft simulator for the 2025 draft class.

- Web scraped 32 NFL teams, 250+ draft picks, and over 200 college prospects with Selenium, storing the data in a PostgreSQL database.
- Designed and implemented a responsive user interface with React and TailwindCSS, featuring draft simulation and an interactive trade system.
- Implemented server-side rendering and API routes with Next.js, utilizing Prisma for efficient database queries.

### Somnos | [github.com/alimomennasab/Somnos](https://github.com/alimomennasab/Somnos)

Sep 2021 - May 2022

Somnos is an IOS mobile application for alerting long-distance drivers against falling asleep at the wheel.

- Developed an accurate eye-tracking system using Swift and the ARKit library, achieving 96% accuracy.
- Demoed prototype application to school district superintendents and 50+ students.

## Skills

---

**Languages:** Java, C++/C, Python, TypeScript/JavaScript, Swift, Kotlin

**Frameworks:** React, Next.js, MUI, TailwindCSS, Prisma, Selenium, PyTorch, TensorFlow, ARKit

**Development:** GitHub/GitLab, Figma, LaTeX
